About This Content

For the first time in SpellForce, you play not as the hero to tell his story, but rather as one of the NPCs. The stories of the scenarios are set before Faith in Destiny and are briefly mentioned there. The scenarios pick up these discussions of their past and tell these stories in detail.

Flink's Secret Diary

Order Master Matricus has recorded his secrets of fire magic in a Fire Ledger a powerful artifact. This compendium grants its owner the powers of fire magic. But the orcs have stolen it. Flink McWinter, a famous thief and scoundrel from the SpellForce universe, was hired by Matricus (or so he claims) to steal back the Fire Ledger. He quickly realizes that this will unfortunately not be an easy task, even for a master thief such as he...

Game breaking bug in the main quest where the horse refuses to walk, had to download a custom save from the forums. Now stuck AGAIN in the second szenario, also game breaking bug in the main quest. Comon.... Far more fun than the campaign. Nothing really new, but at least there are many things to do and the story is far better (without being extraordinary either).

It's the good old Spellforce I was wishing to find when I bought Faith in Destiny.
